

## July 2019 New Features Bulletin

Here is a summary of all the new features and changes that were released in iCrew during July 2019. Links to all other bulletins can be found [here](#).

### Option to allow members to update a document status

You can now mark a document to allow members to update their status. This can help take the burden off your club administrator for tracking some document's status. Look for this checkbox on the Document page.

Member may update their status:

### Support for oars ownership

As with boats/shells, you can now specify the owner of oars. This will be used if you allow privately owned oars to be stored in your boathouse. If your club allows reservations, a member's personal oars will be offered at the top of the available oars list when they make a reservation.

Owners: [Ann Mason](#)

Privately owned:

Non-owners allowed to reserve:

### Added discount amount for fee items

You can now specify a fee item discount amount for a member. The discount amount reduces the amount due from the member for the fee item. As shown below, this member receives a \$20 family discount so instead of owing \$260 they owe only \$240. **NOTE:** Scholarship amount can also be applied and also reduces the amount due from the member.

## Update Member Fee item

**Fee item:** Masters PM Winter Dues

**Member:** Charlie Abbott

Update the fee item information, then click the **Save** button.

Item amount:	<input type="text" value="260.00"/>
Due date:	<input type="text" value="2017-11-04"/>
Paid:	<input type="checkbox"/>
Paid date:	<input type="text" value="0000-00-00"/>
Scholarship amount:	<input type="text" value="0.00"/>
Discount amount:	<input type="text" value="20.00"/>
Amount paid:	<input type="text" value="0.00"/>
Amount due:	<input type="text" value="240.00"/>
Payment method:	<input type="text"/>
Alternate PayPal button:	<input type="text"/>
Bookkeeper's note:	<input type="text" value="family discount"/>

## Improved tracking of oars in practice sessions

Now as you allocate oars across multiple line-ups for a practice session (Ex. Eight sweep oars split between two four-person boats), iCrew will show you a warning if you over allocate any given set of oars.

The screenshot shows the iCrew interface with a warning message: "Message from iCrew: M oars have been over-allocated." The interface displays various boat types and oar allocations. A red box highlights the "ATHENA (4+)", "Andys shell (4+)", and "Gonzales (2-)" boat types, each with an "M" oar allocation below it.

## Random line-up generator

You can now generate up to eight 8+ random line-ups for a practice session. If the session includes at least 18 people (enough to fill two 8+ line-ups) you will now see a button to generate random line-ups. This includes allocating boats and coxswains to all line-ups. The process will also take into consideration any member's port/starboard preference. Be sure the first set of line-ups is completely empty before using this feature.

Watch a short demo video here: <https://www.screencast.com/t/hbSCoNDe7PpR>

## Clear all line-ups now include boats and oars

Now when you clear a line-up or all line-ups, boats and oars will also be removed from the line-up grid.

## Shell and oars tiles appear in black on line-ups page when item is away at a regatta

When doing line-ups, if a shell or oars are away at a regatta (based on regatta trailing load and unload dates/times) the item will be shown with a black background and white text.

If you have any questions about these new features, send me an [email](#).

Thanks,

Kevin
