

## June 2019 New Features Bulletin

Here is a summary of all the new features and changes that were released in iCrew during June 2019. Links to all other bulletins can be found [here](#).

### Option to allow members to update document status

A document now has the option to allow members to update the on-file status and expiration date for their tracking record. Look for this checkbox on the **Document** record:

Member may update their status:

When this option is checked, each member will see a button in the **Update status** column on their **My Documents** tab. This button will take them to a screen where the on-file status and expiration date can be updated.

## System admin can fully delete a member from the club

A system admin in your club can now fully delete an archived member from the club. **NOTE:** The member must first be archived. If you're sure they will not row again with the club, you can remove them from the club.

Alternate Email addresses:	
Member is archived:	<input checked="" type="checkbox"/> <a href="#">Remove from club...</a>
Member may send messages to all:	<input type="checkbox"/>
Member is blocked from sessions:	<input type="checkbox"/>

## Reservations included on Today page

For those clubs that allow reservations for independent rowing, a tile for each reservation is now shown on the **Today** page.

### Today @ RRI

The screenshot displays the 'Today @ RRI' page with several activity tiles. A red box highlights two reservation tiles: 'David B Reservation' and 'AJ F Reservation'.

## Boats and oars can be marked unavailable

Boats and oars/blades can now be quickly and easily marked as "unavailable". When equipment is marked unavailable, it cannot be reserved for independent rowing. The equipment will appear on the session line-ups page as a black tile. Screenshots below show more information. **NOTE:** This option can be used when equipment is away from the boathouse or perhaps when a boat is unrigged or is unusable for any reason.

### New Equipment Availability Page

## Shells & Oars Availability

Use this page to mark shells and oars as unavailable when equipment is away from the boathouse or cannot be rowed for any reason. This page can also be used to mark equipment as available again when it has returned to the boathouse and is available again.

The shells and oars that are currently marked as unavailable appear below as **black** tiles. Tap the shells and oars to change their availability status.

Regatta trailer loading/unloading dates/times used to show boat and oars as unavailable for reservations

When a regatta session is created, iCrew automatically generates a Regatta Information record that includes trailer load and unload date/time. These dates and times are now used by iCrew to prevent any boat or oars used at the regatta from being reserved from the time the trailer is loaded to when it is unloaded.
