

June 2020 New Features Bulletin

Here is a summary of the new features and improvements released in iCrew during June 2020.

NOTE: Links to all previous bulletins can be found here: <https://icrew.club/bulletins>.

Contact Tracing

Contact Tracing report

You can generate a **Contact Tracing** report for a selected date range. The report will list club members that had a boat reservation, attended a session, or logged a boathouse visit on any of the selected dates. The **Contact Tracing** report is accessible from the **Club Home** page.

Log boathouse visit

To help track all visitors to the clubhouse, anyone can now log a boathouse visit. Look for this **Boathouse visit** button near the top of the **Today** page.

Reservations and On-the-Water (OtW) Log Changes

Show list of unavailable boats on Make Reservation page

When making a reservation, the list of unavailable boats is now shown at the bottom of the page. The reason the boat is unavailable is included.

Tile colors for shells and oars shown on Make Reservation page

Tile colors specified on the boat and oars profiles are now reflected on the Make Reservation page.

Date range selection added to Reservation History page

You can now specify a date range on the **Reservation History** page.

Send Message page accessible from Upcoming Reservation list page

To help facilitate sending a message to members with an upcoming reservation, you can access the Send Message page from the **Reservation List** page.

The screenshot shows a section titled "All Upcoming Reservations" with a checkbox for "My reservations only". Below this are three buttons: "Reserve a shell...", "On-the-Water Log", and "View history...". A "Send message using" section contains three radio buttons: "To line" (selected), "Cc line", and "Bcc line". A "Send message..." button is located below these options.

Default to show just member's privately owned equipment when making a reservation

When a member that owns their own equipment goes to make a reservation, only their equipment will be listed by default. If they need to use club equipment, there is a box they can check to include club equipment.

Enable reservation note to be updated on the OtW Log page

The reservation note can now be updated on the **OtW Log** page.

Change OtW Log tiles to mimic Today page tiles

The tiles on the **OtW Log** page now mimic the Today page tiles so you have a visual indication as to whether the reservation is up coming, completed, or if the rower is current on the water.

The screenshot displays three reservation tiles. Each tile shows the member's name and status (e.g., "Kathy Pauly Private"), start and end times (e.g., "5:57am" to "7:30am"), and "Change" or "Check in/out" buttons. Below the times is a text input field labeled "Enter note here..." and a "Save" button. The tiles are color-coded: light green for Kathy Pauly, grey for Gail Horstman, and light blue for Joseph Costello.

Add boat damage report from OtW Log page

A button has been added to the **OtW Log** page to allow the member to log boat repair request/damage report.

Allow Check In/Out times to be changed on the OtW Log page

The check out/check in times can now be changed on the **OtW Log** page.

Kiosk mode support for Today and OtW Log pages

The **Today** and **OtW Log** pages can now be opened in “Kiosk” mode. This mode does not require someone to be logged into iCrew and is designed for the page to be shown on a shared computer at the boathouse. You must be a club administrator to access the kiosk mode from the **Today** page.

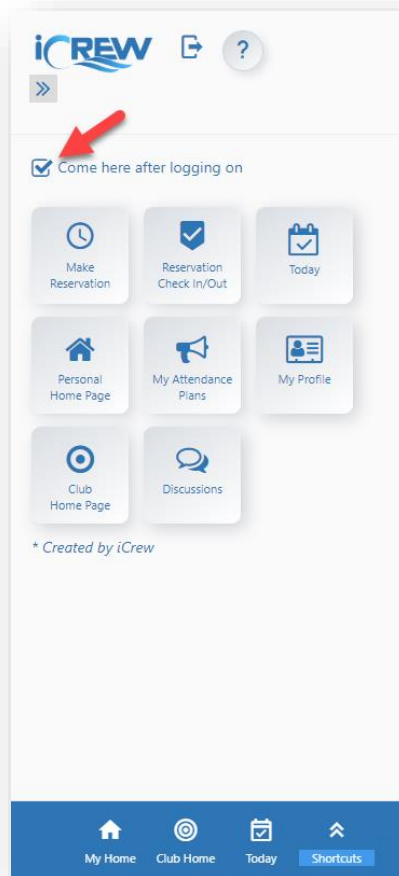

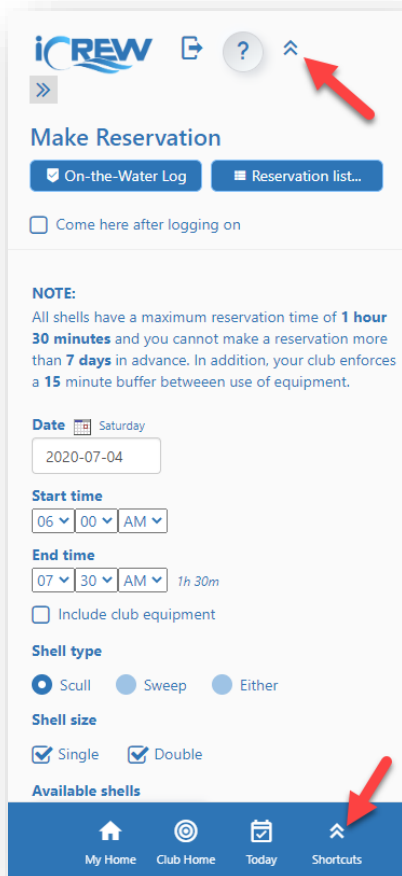

Learn to Row (LTR) skill level added to boat and member profiles

LTR has been added as a skill level for members. This is the lowest of the four skill levels available for a member, along with a related setting on a boat/shell profile.

Other Changes

Member Shortcuts panel

A new **Shortcuts** panel has been added for club members to have a simplified view in iCrew. The **Shortcuts** panel can be accessed by tapping the double-up arrow at the top of the page or by tapping the Shortcuts icon at the bottom of the page when accessing iCrew from a mobile phone. The **Shortcuts** page can be set as the page the member views immediately after logging on. The first screen shot shows how to access the **Shortcuts** page and the second screenshot is the **Shortcuts** page.

Member limit on a team/squad

You can now set a limit on the number of members allowed to join a team/squad. Leave the field blank if there is no limit.

Member limit (leave blank for no limit):

Support for club groups

If you have multiple clubs that row out of the same boathouse, you can get an all-up view of all associated clubs on various pages in iCrew including Today page, OtW Log, Reservation list, and Reservation Calendar.

NOTE: Each club retains their own autonomy in the system. Contact us for more information.

Include list of teams for member reporting the boat damage/issue

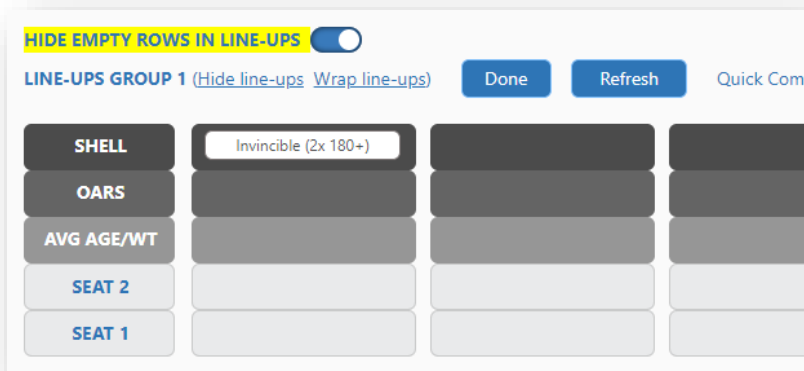

When viewing a boat damage report, the list of teams/squads is shown for the person that reported the damage.

Enable teams to be added to all future sessions instead of just the single session

When adding another team's members to a session, you can now add the members to all future sessions for team.

Hide empty rows on Line-ups page

The Session Line-ups page now enables you to hide empty rows in the line-ups grid. So now, if you know you're only doing line-ups for doubles, drop a 2-seat boat in the line-up grid, then toggle **Hide empty rows**.

Support for a Location record to contain a Zoom channel link

For those virtual work-out/training sessions, a Location can now include a Zoom (or any online meeting) link.

Support for a dashboard to be shared with members

A dashboard created by a coach or admin can now be shared with members of the club.

Block new members from reserving a boat or attending a session until document is signed

A document can now be setup to block **new** club members from reserving a boat or attending a session until the document has been signed.

Show sessions for a team where the team is not the owner-team of the session

If you have any questions about these new features, send us an [email](#).

Thanks,

Kevin @ iCrew
