

## New Features Bulletin

March 2019

Here is a summary of all the new features and changes released in iCrew during March 2019.

### Added option to delete a discussion thread

If you're an administrator for your club, you can now delete a discussion. Look for the trashcan icon on the discussion page as shown below.

The screenshot shows the iCrew interface with the 'Discussions' tab selected. A red arrow points to a trashcan icon next to the discussion titled 'Tue/Thur evening erg practice anyone?'. The discussion was started by Frank Dotson on Sep-02 at 4:00pm in the 'Masters General' category. Other discussions listed include 'Code of Conduct Reminder' and 'Hidden carbs'.

### Most recent discussions now shown by default

When a member logs onto iCrew, if there is discussion activity posted since they last logged on, the Discussions tab will be highlighted as shown here. If they are accessing iCrew from their mobile phone, the discussion icon at the bottom of the screen will be highlighted.

The screenshot shows the 'Member's Home Page' for Ann Mason (ann@icrew.club). The 'Discussions' tab in the navigation bar is highlighted in pink, indicated by a red arrow. Below the navigation bar, there are sections for 'Today's Line-up', 'My Attendance Plans' (with buttons for Drop-in..., History..., C&C list..., and Reserve...), and 'Regattas (hide)'. A 'My Journal' section is partially visible at the bottom.

When they view the discussions page, only the recent activity will be displayed. They can click the **View all...** button to see all discussions.

A coach or admin can access this page for an athlete's attendance history page which can be viewed from the Members tab of the Coach's Home Page.

## Added ability to create and update location records

You can now add and edit location records for your organization. A location is where sessions, events, or regattas take place and includes the GPS coordinates.

## Added extract file option for boats/shells and oars/blades

From the boat/shell and oars/blades list pages, look for the download icon.

## Added option to send weekly email reminder for unpaid fee items

You now have the option to have iCrew automatically send a reminder email to members for unpaid fee items. The reminder is sent once a week to anyone that has a balance due on the item. This option is available on each fee item. See new checkbox below.

A screenshot of a web form titled "Update Fee Item". At the top, there are two buttons: "View member records..." and "Delete member records...". Below these is the instruction: "Update the fees item information, then click the **Save** button." The form contains several fields: "\*Name:" with the value "AllMasters fee: 4/22/2018"; "\*Description:" with the value "AllMasters payment tracking for 4/22/2018 event"; "\*Amount due:" with the value "0.00"; "\*Due date:" with the value "2018-04-22"; "Effective start date:" with the value "2018-04-22"; "Effective end date:" with the value "2018-04-22"; "Multiple payment options?" with an unchecked checkbox; "Send payment reminder?" with a newly added unchecked checkbox, which is pointed to by a red arrow; and "Send notification when paid?" with an unchecked checkbox.

## Added boat seat configuration

A new field has been added to the boat/shell profile page labelled **Current seat config**. This field represents the current seat rigging configuration - port (stroke)/starboard (bow) - going from stern to bow. So for a port stroked eight, the value would be "pspspsps". A starboard stroked config would be "spspspsp". Another example of a port stroked eight with a bucket at seats 5 and 6 and a starboard bucket at 3 and 4 would be "pspppsps". This value is used on the Line-ups page. Watch this short video for more info: <https://www.screencast.com/t/ieDizrAwV>

## Improved sorting and filtering on sessions list

The session list page now allows you to sort on any column and you may also enter a search value to filter the data. This video shows how to use the functionality: <https://www.screencast.com/t/PW6TdqaITV6e>

## Added option to flip a session to On-land from Today page

You can now change a session's "on-land" flag from the Today @ page. This is most helpful if you had planned to row, but inclement weather or other variables kept you on land. This is an important setting if you had line-ups set for the session so that athletes set to be coxswain for that session do not receive coxing credit.

## Improved sorting and filtering on boat/shell list

The boat/shell list page now allows you to sort on any column and you may also enter a search value to filter the data.

## Added a Tests list to show all test for a team or for all teams

From the **Tests** tab on the Coach's Home Page, you can now access a list of tests for a specific team or all teams. From the test list page, you can get to the test results page or update a test. And from the test results page, you can access results for an athlete.

## Test PRs added to athlete's test results page

An athlete's personal records are now shown at the top of their test results page.
