Shell major damage included in shells lists

You can now see if a shell has major damage in the shell lists.

The screenshot shows a software interface with a sidebar on the left containing navigation items: Organization, Teams, Members, Sessions, Tests, Shells (highlighted), Oars, Documents, Fees & Payments, Discussions, and Events. The main content area is titled 'Shells' and features a 'Shell:' dropdown menu. The dropdown menu is open, showing a list of shells. The shell 'damaged: Corkery Jr (8+ Nov. / 200)' is highlighted in blue and circled in red. Other shells in the list include Cascadia (4+ Nov. / 150), Chicka* (4x Nov. / 150), Colleen (1x Int. /), Columb. City II (2- Int. / 200), Conibear (2x Int. /), Corazon* (8+ Nov. /), Corkery Sr. II (4x Nov. / 150), D. Johnson (1x Int. /), Eadon (8+ Nov. / 180), and Genessee II (4+ Nov. / 180). Below the screenshot, a table snippet shows a row with the following data: 8, Sweep, Sweep, 200, dmgd: Corkery Jr, and City tag: 207.

8	Sweep	Sweep	200	dmgd: Corkery Jr	City tag: 207
