

New Features Bulletin

September 2018

Here is a summary of all the new features released in iCrew during the month of September, 2018.

New footer on mobile devices

A much more useful footer now appears at the bottom of all iCrew pages when you're using a mobile/small screen device.

iCrew coach/admin community discussion channel

There is a special discussion channel setup in iCrew for all coaches and admins to use across all organizations. Even if your org is not using the [discussions feature](#), you can join in on discussions with coaches and admins from all other orgs that use iCrew. This is a great place to ask questions, share best practices, etc.

Just click on the **Discussions** tab at the top of any page to get started.

Damage reports for launches

You can now log damage reports for launches that you have defined in iCrew. Look for your launches in the dropdown list when logging a new repair request.

New member profile flag: Receive alerts as text message

Most alerts that you get via email can now also be delivered to you as a text message. Just check this new field in your profile if you would like alerts via text message.

Country:	United States
Receive alerts as text message?:	<input checked="" type="checkbox"/>
Mobile phone:	2069631895
Mobile carrier:	Verizon
Home phone:	2069631895

Alert to coaches on toggle in/out activity

Unexpected changes in attendance plans can be challenging. Now iCrew will alert you if an athlete changes their attendance plans (toggles in or out) of a session within a certain number of hours before the start of the session. The hours buffer can be set to any value on each team's profile.

Coach 3 name:	<input type="text"/>
Toggle alert hours buffer:	<input type="text" value="12"/>
Allow rowers to join this team?:	<input checked="" type="checkbox"/>

Integration with RowingManager for Australian customers

Our customers in Australia can now take advantage of integration between iCrew and RowingManager, similar to the integration between iCrew and RegattaCentral.

If you have any questions about these new features, send me an [email](#).

Thanks,

Kevin
