

September 2019 New Features Bulletin

Here is a summary of all the new features and improvements that were released in iCrew during the month of September. Links to all previous bulletins can be found [here](#).

Changed default view of the Team Roster to include a card for each member

The default view for the **Team Roster** now shows a card for each member with their picture (if provided by member), name, email address, phone number and age. If they have a port (stroke) or starboard (bow) side preference, you will see a **red** or **green** shadow on their picture. Coaches and admins will also see a row of icons at the bottom of the card that provides access to the member's profile, document tracking, payment tracking, attendance history, journals, test results, and teams. Members can also access this page but they must be a member of the team whose roster they wish to view.

NOTE: To show the original list view of the team roster, click the **List view** checkbox near the top of the page.

Increased length of session workout plan

The length of a session's workout plan has been increased and you'll now get a warning if you exceed the length.

Added Tile name to boat profile for display on the Line-ups page

An optional **Tile name** field has been added to the shell/boat profile (see **red** arrow below). If you enter a value in this field, it will be used on the **Line-ups** page for boat's tile instead of the full shell/boat name.
